Focus

AirSep places the focus on patients' comfort and convenience in the most lightweight innovation in portability that has ever been unveiled. Significantly lighter than any other portable oxygen solution, the new Freestyle Focus™ addresses the oxygen prescription needs of the majority of respiratory patients.

The Focus Portable Oxygen Concentrator (POC) provides the solution to the most common issue of finding an oxygen system that a patient can carry - and even feel good about carrying. Oxygen patients need no longer face the burden of extra weight from a system that is more than what is needed to meet their clinical requirements.

When contrasting the Focus POC with small cylinders or liquid units that need to be delivered and refilled on a regular basis, Focus again puts a spotlight on your savings, while providing your patients with a variety of travel advantages.

Using a pulse flow setting of just 2lpm equivalency, this mini-weight portable oxygen concentrator makes its own oxygen on demand and is simple to handle, simple to carry, and simple to understand. No confusing or complicated control panel read-outs. Just flip a switch to turn it on and Focus does the job. The non-medical-looking Focus POC ensures you stay as mobile and active as possible. Oxygen has never been this easy!

Multiple Power Options

The external micro-battery provides advanced duration times in a very small device that easily attaches at one's hip, on a belt, or even to the unit's

Technical Specifications

Oxygen Concentration

Pulse flow equivalent to a continuous flow of 2LPM

Based on an atmospheric pressure of 14.7psia (101kPa) at 70° F (21C°)

Dimensions

15.7cm H x 11.7cm W x 6.1cm D
6.2in. H x 4.6in. W x 2.4in. D

Weight

1.75lbs (0.8kg)
2.2lbs (1kg) with micro battery

Power

100-240 Volt AC 50/60hz, 11-16 Volt DC;
Rechargeable lithium battery

Battery Duration

From 3 - 6.5 Hours
Supplied with 2 x 1.5 hour micro batteries (3 hours total)
Additional battery belt available giving an extra 3.5 hours
Extra micro batteries available on request

Audible Alarms & Visual Indicators

Low Battery, Cannula Disconnect,
System Overdraw, High & Low Pressure,
High Temperature

Why Choose pure O₂?

- **Dedicated After Sales Support**
- **Extensive warranty UK & Abroad**
- **Open 24 hours a day**
- **Best Buy Guarantee with unbeatable discounts**
- **One of the main POC supplier to both NHS & Private Patients**
- **Manufacturer recommended UK Service & Maintenance centre**
- **Part-Ex and Buy Back service available to our customers**

WHY NOT PAY A VISIT TO OUR SHOWROOM
